

SUPPLEMENTARY INFORMATION

THE RHODOPSIN-TRANSDUCIN COMPLEX HOUSES TWO DISTINCT RHODOPSIN MOLECULES

Beata Jastrzebska^{1*}, Philippe Ringler², Krzysztof Palczewski^{1*} and Andreas Engel^{1,2*}

SUPPLEMENTAL FIGURES

Figure S2. *TEM analysis of the Rho*•G_t-DDM complex.* TEM image of negatively stained Rho*•G_t-DDM complexes (top panel). Scale bar 500 Å. 2D class averages obtained from particles manually selected from images taken at 0° tilt (bottom panel). Scale bar 100 Å. Asterisks indicate projections of class averages clearly displaying a tri- or tetra-lobed morphology of the complex.
